Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Discussed the Simpson reference and how the retaining clips of Simpson were slidable relative to the seating member of Simpson. It was explained that some transverse movement would occur between the two members and that it was considered to be enough in order to meet the limitations of the claim. The limitation of the structure of the retaining clip was also discussed, the claims only require that the clips be located on either end of the seating member, and therefore the Simpson reference meets the limitation for the claim. No agreement with respect to the claim language was reached.
